NPIC/P&DS/E-6-525
4 October 1966

MEMORANDUM FOR: Director, National Photographic Interpretation Center

THROUGH: Chief, Support Staff, NPIC

SUBJECT: Request for Approval to Let a Contract for Technical Services in FY 1967

REFERENCE: NPIC/P&DS-6-061, dated 20 July 1966

1. The referenced memorandum requested approval for three Time and Material contracts which were to provide technical services in certain specialized areas. These contracts would provide consultant and industrial assistance to the Exploratory Development Laboratory Branch in the pursuance of their assigned projects. Two of the three have been or are being negotiated.

2. Recent developments in the Exploratory Development Laboratory Branch will require industrial implementation of the glass-etched phase gratings now nearing successful realization. Since Diffraction Limited, Inc. will be responsible for the optics of direct large viewing devices, they are the logical company to carry out the production work on the phase gratings. In addition to this, small projects dealing with the geometrical aspects of optical design can be handled by their capable staff.

3. It is therefore requested that a contract for providing technical and scientific services in geometrical and physical optics be approved, with Diffraction Limited, Inc. the contractor. The proposed amount for FY 1967 This is considered adequate to carry out the required services.
